

SMS Spam Detection

MACHINE LEARNING MINI PROJECT

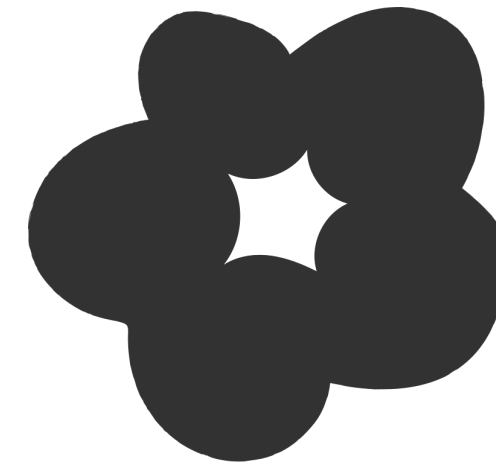

By- Aman Kumar Singh Batch 3

Problem Statement

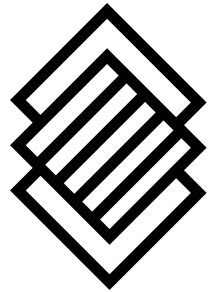

- Detect whether an SMS is Spam or Not Spam using Machine Learning.

Technologies Used

- Python
- Flask
- Scikit-learn
- Pandas
- HTML
- CSS
- JavaScript

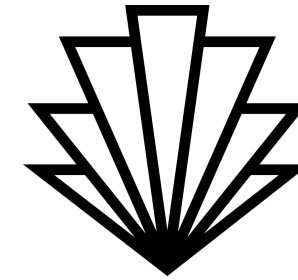

Dataset

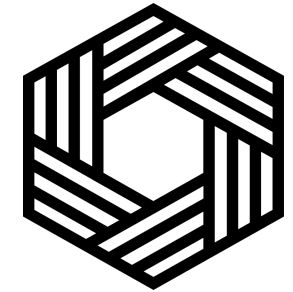

SMS Spam
Collection

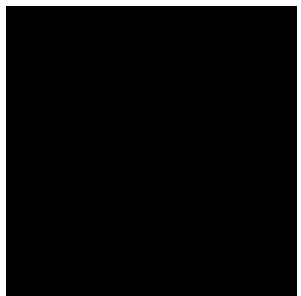

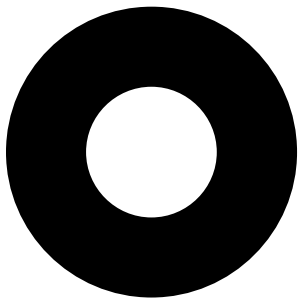

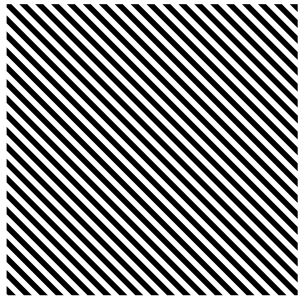

5572 SMS

Ham: 4825

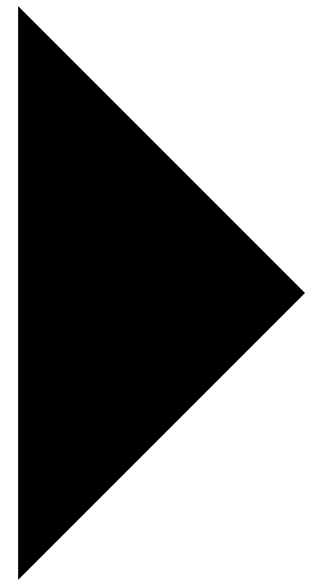

Spam: 747

Model

- TF-IDF Vectorizer
- Multinomial Naive Bayes
- Accuracy: 97.94%

Workflow

Dataset -> Preprocessing -> TF-IDF -> Train -> Save Model -> Flask App -> Prediction

Features

- Spam Detection
- Confidence Score
- Progress Bar
- Character Counter
- Prediction History
- Clear Button

Simple, Fast and Accurate SMS Spam Detection System

Conclusion

Thank You
